AP013

XACP

ALCOHOL WIPE

Includes:
1 − Adhesive Dash Mounting Disk (AP013)
1 − Alcohol Pad (XACP)

Important: Clean the application surface and make sure it is free of dirt, dust, and grease before installation.

Note: The adhesive disk is designed for semi-permanent installation and is meant for one-time use only.
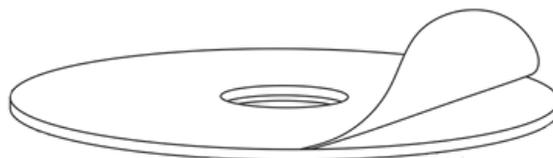

---

1 Preparing the flat surface area
Select an appropriate location away from airbag zones and road view. Then, clean the dashboard area with the provided alcohol pad. Please allow the area to dry before applying the disk.

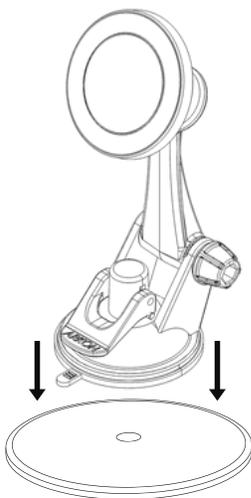

2 Installing the mounting disk
Peel off the paper backing from the disk and position it on a clean, dry surface. Then, firmly press down on the top of the disk to allow the adhesive to bond with the surface. Finally, allow a minimum of 24 hours for the adhesive to cure before applying any pressure.

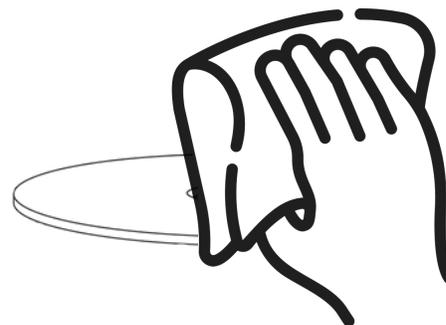

3 Install a sticky suction mount on surface
Install the suction mount on a clean, dry, flat surface using provided alcohol pad. Remove protective film, press suction mount firmly, and secure by flipping the lever down. If you prefer to mount it on the dashboard, the adhesive disk is optional.

4 Removing the mounting disk
First apply rubbing alcohol or an adhesive remover to the area with a cotton swab and let it saturate for a minute. Then, use dental floss to cut through the adhesive by working back and forth at the disk's base. If any adhesive remains, re-apply the alcohol and gently lift it off by hand.

WARNING
CHOKING HAZARD - Keep out of reach from children under 8 yrs. as they can choke or suffocate on parts included with this system

WARNING
Arkon® is not responsible for any damages caused to your device or yourself due to the installation or use of this mount.
