

AP013

GN079

XACP

Includes:

- 1 - Sticky Suction Mount with 17mm Ball (GN079)
- 1 - Adhesive Dash Mounting Disk (AP013)
- 1 - Alcohol Pad (XACP)

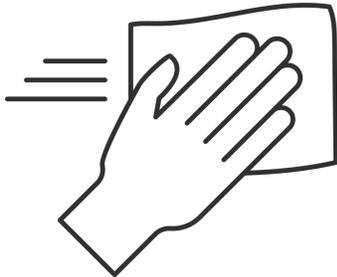

Important: Clean the application surface and make sure it is free of dirt, dust, and grease before installation.

Dashboard Mounting Warning: Do not use the sticky suction pedestal on soft vinyl, leather, or similar materials to avoid permanent indentations. Instead, use the included adhesive disk. For some surfaces, press firmly on the suction base while engaging the lock lever for secure mounting.

Note: If the adhesive suction base gets dirty or loses its stickiness, wash it with warm water and mild soap, then allow it to air dry. The adhesive disk is designed for semi-permanent installation and is meant for one-time use only.

1 Preparing the flat surface area

Select an appropriate location away from airbag zones and road view. Then, clean the dashboard area with the provided alcohol pad. Please allow the area to dry before applying the disk.

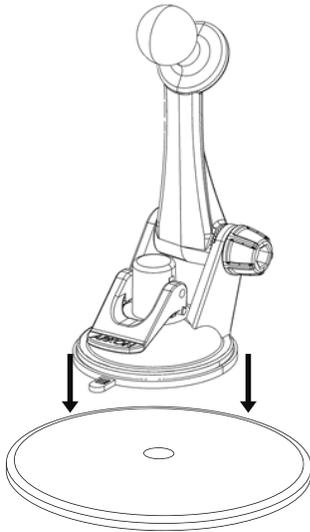

2 Installing the mounting disk - Optional

Peel off the paper backing from the disk and position it on a clean, dry surface. Then, firmly press down on the top of the disk to allow the adhesive to bond with the surface. Finally, allow a minimum of 24 hours for the adhesive to cure before applying any pressure.

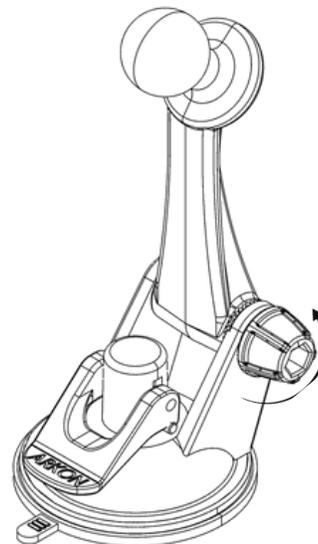

3 Install a sticky suction mount on surface

Install the suction mount on a clean, dry, flat surface. Remove protective film, press suction mount firmly, and secure by flipping the lever down. If you prefer to mount it on the dashboard, the adhesive disk is optional.

4 Adjusting the mount's angle

To modify the angle of the mount, rotate the knob counter-clockwise. To secure the angle in place, turn the knob clockwise.

WARNING

CHOKING HAZARD - Keep out of reach from children under 8 yrs. as they can choke or suffocate on parts included with this system

WARNING
