

Includes:

- 1 – Magnet Mount Kit for Phones (SPHDMAGKIT)
- 1 – Sticky Suction Mounting Pedestal (GN079)
- 1 – Adhesive Dash Mounting Disk (AP013) - Optional
- 1 – Alcohol Pad (XACP)

Dashboard Mounting Warning: The sticky suction pedestal should not be used on dashboards made of soft vinyl, leather, or similar materials, as it may leave a permanent indentation. To prevent this, use the included adhesive mounting disk. On certain dashboard surfaces, you may need to press down firmly on the suction base while engaging the suction lock lever to create enough suction to hold the mount securely.

Note: If the adhesive suction base gets dirty or loses its stickiness, wash it with warm water and mild soap, then allow it to air dry.

1 Assembling the Components

First, detach the tightening ring from the magnetic holder and position it onto the 17mm ball of the pedestal. Next, insert the pedestal into the rear part of the magnetic holder. Finally, twist the tightening ring clockwise to secure it in place.

2 Installing the Magnetic Plate on Your Device

To attach the magnetic plate to your smartphone, just remove the 3M sticky side and apply one of the two plates to the back of your device.

3 Install on the Dashboard or Windshield

Place the suction mount to the surface and engage the suction lock lever. If you prefer to mount it on the dashboard, the adhesive disk is optional.

4 Mounting Your Phone on the Holder

Simply attach the metal plate to the back of your smartphone, ensuring it comes into contact with the magnetic head on the mount. Adjust the angle or rotation as required for a secure fit.

WARNING

CHOKING HAZARD - Keep out of reach from children under 8 yrs. as they can choke or suffocate on parts included with this system
